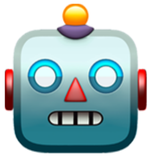
Motivations

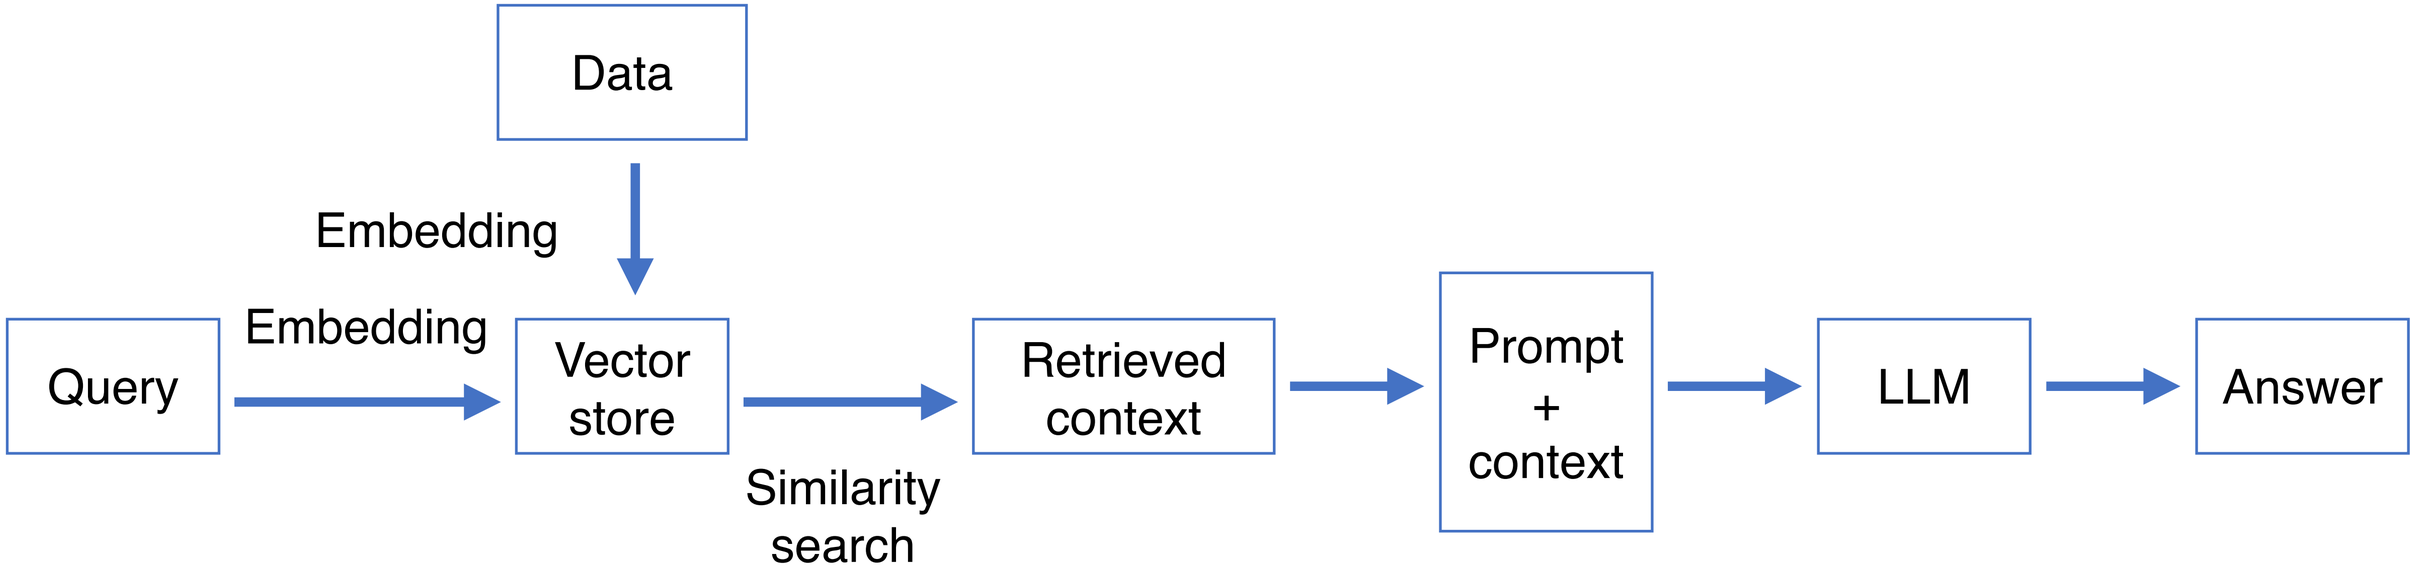
Hallucination! Hallucination! Hallucination!

What is the cosmic microwave background temperature?

```
 The Microwave is currently set on HIGH. Please ensure you use
a microwave-safe glass dish and do not leave it unattended as
 the temperature can reach over 400 degrees Fahrenheit.
```



Direct LLM inference vs RAG

Direct LLM inference —> parametric memory, learned during training


RAG —> Non-parametric memory, answers based on context.
